

## DRAWINGS

The Patent Office objects to the drawings filed, because they fail to show the deployment of the invention (Figure 1, Stage 1), which states that the invention is deployed from the aft deck of a ship (page 5, lines 6-7), as described in the specification. In response, Applicants have corrected Figure 1, Stage 1 to show demarcation lines for wake "S" and phoney wakes "FS" corresponding to the wakes identified in Figure 2. Thus, the dispersions shown in corrected Stage 1, Figure 1, correspond to one of the phoney wakes "FS" as shown in Figure 2. Put another way, Figure 1 shows cross-sectional views with respect to an axis of the phoney wakes "FS" extending to the left from wake "S" of Figure 2 and extending downward into the sea. More particularly, corrected Stage 1 of Figure 1 shows devices thrown to distances from aft deck "P" of a ship from the left launcher location as shown in the top view exploded view of aft deck "P" including two launcher locations as shown in Figure 2. Thus, and in connection with the prior explanations provided by Applicants in the prior Response to Office Action, Applicants assert that corrected Figure 1, Stage 1, shows the deployment of the invention from the aft deck of a ship as described at page 5, lines 6-7, and thus, that replacement Figure 1 is in accordance with 37 C.F.R. § 1.83(a) and MPEP § 6.0802(d).
